### **DETAILED ACTION**

Claims 29-59 have been renumbered as claims 28-58 as no claim 28 was originally filed.

Applicant should note the disposition of the parent case in the specification.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28,54, drawn to a hammermill with a grate assembly, classified in class 241, subclass 186.2.
- II. Claims 29-42,56-58, drawn to a hammermill with an annular peripheral ring, classified in class 241, subclass 188.1.
- III. Claims 43-53,55, drawn to a hammermill with a particular type hammer, classified in class 241, subclass 194.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II/III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the inventions can be used to shred material without the specifics of the other Groups. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3725

A telephone call was made to Mr. DeCarlo on 7/26/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Rosenbaum whose telephone number is 571-272-4523. The examiner can normally be reached on Monday-Friday.
